

IQAir® HealthPro® 250: The World's Most Advanced Air Cleaning System

IQAir systems are used by world leading research institutes, hospitals and commercial Institutions to provide targeted air cleaning solutions for critical environments. The IQAir HealthPro 250 offers the same outstanding technologies for the control of airborne allergens, pathogens, chemicals and odours in a compact format for use in residential and office environments.

Powerful Performance

The world's only domestic air cleaner that has a classified HEPA filter in accordance with EN 1822. EN 1822 is Europe's most stringent filter test standard for hospital and cleanroom filters.

The world's only domestic air cleaner which is individually tested and certified. Each IQAir HealthPro 250 is supplied with its very own hand-written certificate detailing the model's test results.

Test winner of independent German consumer product test (Stiftung Warentest*):

- The only air cleaner to receive the top mark „very good“ for the filtration of airborne particulates (e.g. allergens, viruses, bacteria and smoke particles).
- Twice the particle removal rate than the next best air cleaner.
- Over 30% more air delivery than next best air cleaner.
- Recommended as best air cleaner for allergy sufferers.

* Stiftung Warentest, test 9/98

Only uses effective and approved filtration technologies (absolutely no ozone generation nor ionization).

The IQAir HealthPro 250 features three independent filter elements to provide maximum filtration efficiency while ensuring that each filter stage can be replaced independently of each other to provide maximum filter yield and minimize replacement cost.

- *PreMax™* – Pre-filter features a filter surface of 2.8 m² (class F8).
- *V5-Cell™ MultiGas™* – Gas & odour filter features 2.5 kg of granulated dual-media that removes a wide-spectrum of chemicals and gases.
- *HyperHEPA®* – Filter features a filter surface of 5.0 m² of hospital grade HEPA filter media (class H12/13).

Filtration efficiency of $\geq 99.97\%$ at ≥ 0.3 microns and $\geq 99.5\%$ for even the smallest particles (e.g. viruses).

Superior Long-Term Performance and Low Cost Operation

- Extra long filter life due to large capacity filters.
- Lower running costs due to fewer filter changes.
- Low electricity consumption due to capacitor switching.
- Individual filter stages. Allows replacement of exactly those filters which are used up.

Exceptional Control Features

- Automatic timer allows programming to suit the user's individual needs (e.g. night time or office hours only).
- Intelligent filter life monitor calculates when it is time to replace filters, taking actual use, actual fan speed and preset pollution levels into account.
- LEDs on the control panel signal which filters need replacement.
- Selection of 6 fan speed settings with top air delivery of 440 m³/hour (with all filters installed).
- Remote control and Mobility Pro casters.

Top Quality

- 3 year warranty (1 year if used for commercial/professional purposes)
- Tough ABS housing construction
- Powerful centrifugal fan certified for non-stop use – Free-flow rate: 1200 m³/hour.

- Patented housing design
- Patented filter design
- 100% Swiss Made

Unique Adaptability

A wide range of IQAir accessories allows customisation of the IQAir HealthPro® 250 to fit individual needs: Wallmounting bracket (VMF™), positive/negative pressure ducting adaptors (InFlow™, VM InFlow™, OutFlow™), coarse dust pre-filter (PF40).
